

Our lineup of safety capacitors are featured in this technical article. 2. xEV and safety capacitors. Safety capacitors are widely used in EVs. The main applications for EV are OBC (On Board Charger), Traction inverter and DC-DC converter. Safety capacitors are used in those applications as a common-mode noise filter and isolation.

Class-X capacitors, positioned between line and neutral, help manage overvoltage by directing unwanted surges safely across the line, thereby protecting sensitive circuitry. Class-Y capacitors, used between line and ground, are crafted to fail open, reducing the risk of electrical shock and enhancing safety in case of high transient voltages.

Murata Electronics" DK1 series is a Y1 safety approved, general purpose resin molded surface mount capacitor ideal for low profile, compact AC/DC switch mode power supply applications. This capacitor is ideal where a low-profile is sought for compact AV equipment, LED illumination, or 1 U rack mounted equipment.

Safety capacitor are divided into X capacitors and Y capacitors. Understanding X capacitor. The full name of the X-capacitor is generally:: X2 (X1/X3/MKP), a capacitor used to suppress electromagnetic interference in ...

Safety Certified Capacitors are designed for surge or lightning immunity in modem facsimile and other equipment. The capacitors of KGK are class X1/Y2 compliant, and the capacitors of KGH are class X2 compliant, respectively. The green type capacitors in KGK/KGH are manufactured by using environmentally friendly materials without lead or cadmium.
