

What is a car battery Buyer's Guide?

Our car battery buyer's guide will show you how to pick the correct replacement battery for your car, saving you both time and money. The main purpose of a battery is to provide the power to start the car and to power its features, such as the door locks and media system, when the ignition is off or in the accessory position.

What to consider when buying a battery?

What are the points to consider when buying a battery? The constantly increasing amount of electrical equipment in cars and new technologies such as start/stop systems or braking energy recovery demand high-performance batteries. Conventional sources of power for example are soon overtaxed by frequent engine starting.

How do I choose the right car battery?

Picking the right battery Alternatively, you can look at the battery in your car itself. It should be clearly labelled, allowing you to check its specification and order the correct replacement. Many batteries will have a two- or three-digit designation, known as a group size, that is a standard provided by the Battery Council International.

Do you need a car battery?

Car batteries aren't an optional extra - they do a few critical jobs within the car and you'd be left at a standstill without one! Starting - when you put your key in the ignition and give it that first half-turn to wake it up, your car battery is making that possible.

How do I find a battery that fits my car?

There are online tools that can identify the battery you need according to your car's make and model, and even better, by your car's registration plate. Click [here](#) to use the battery finder tool. It will list all the battery sizes that fit your car. So, great. Now you have a list of batteries that will definitely fit your car.

How many types of batteries are there?

Okay, so on that list of batteries of the right size, you'll notice there are 3 different types of battery: We'll keep this simple. If your car DOES HAVE a stop-start system you must get either of no.2 or no.3 on that list, that is you must get an EFB or an AGM battery.
