Windows Power Mode - Better Performance (if you dont mind the battery hit, this wont make you throttle, that'll come more from Samsung's mode than Windows Power Mode) Windows Power Plan - Samsung's default For me I have Plugged in - Optimized - Better Performance Unplugged - Optimized - Better Efficiency

This will lower screen brightness, adjust CPU frequency, and turn on low power mode as needed. 5G uses more battery than 4G. If 5G isn't essential, enable Turn off 5G to restrict it until you switch to Standard battery saver or turn Battery saver off . Essential apps will always run. Non-essential apps are greyed out, so you can't open then, and ...

I think Power Mode switches the EPP values. EPP basically defines how fast should the CPU do stuff. The default value is 84 which is more towards the performance side, while battery would then be at about 128 (balanced). The high performance mode would possibly set EPP to 0, which means prefer max speed.
