

What is a waterproof battery box?

A very useful piece of kit that will protect your battery in all weathers. This large-sized fully waterproof battery box can hold up to 110a battery safely and securely. It has internal dimensions of 235mm high (including lid recess) x 375mm wide x 198mm deep and external dimensions of 260mm high x 450mm wide x 240mm deep.

How to protect your e-bike battery?

Simply remove the e-bike battery protective case and clean it regularly. Made of high-quality insulating neoprene, 5mm thick, and elastic material that fits your battery frame perfectly. E-bike battery protection protects it from low temperatures by being insulated and waterproof, making your e-bike easy to ride even in cold weather.

How long is a neoprene e-bike battery cover?

Low temperatures can reduce the runtime of your e-bike battery. With this insulated neoprene e-bike battery cover, the range of your battery is extended. The length of the bicycle battery protector is 21.3" (54 cm) (which can almost completely cover the entire battery compartment), suitable for frame circumferences from 11.02" to 17.72" (28-45cm).

Why should I use our e-bike battery cover?

Highly recommend using our e-bike battery cover to protect your battery and extend its life at temperatures below 15 degrees. Increase your bike's performance: Similar to your smartphone, the lithium-ion battery does not last as long as usual in low temperatures.

Why do you need an electric bike battery protective case?

It has a perfect protection effect on the battery, enhances the sealing and fit, and fits your battery perfectly without falling off. Say goodbye to scratches, stone chips, bumps, or dirt on your e-bike with this electric bike battery case. Simply remove the e-bike battery protective case and clean it regularly.

Should I use a cold shield on my e-bike battery?

*NOTE: We recommend using the cold shield only when the outdoor temperature is below 15 °C. Also, the cover should be removed when charging to prevent the battery from overheating. Low temperatures can reduce the runtime of your e-bike battery. With this insulated neoprene e-bike battery cover, the range of your battery is extended.

For an outdoor installation, the battery should be able to withstand the weather, hence IP ratings should be higher. IP ratings of 65 or over should be fine for an outdoor ...
