

Why is the UK investing in battery manufacturing?

The UK government is committed to continuing to invest in UK battery manufacturing. This strategy builds on our impressive track record of targeted government support, leading to a pipeline of investments through the battery ecosystem:

What does the UK's 2030 vision mean for the battery industry?

The government's 2030 vision is for the UK to have a globally competitive battery supply chain that supports economic prosperity and the net zero transition. The UK will be a world leader in sustainable design, manufacture, and use of batteries, underpinned by a thriving battery innovation ecosystem.

Will the UK be a world leader in battery innovation?

The UK will be a world leader in sustainable design, manufacture, and use of batteries, underpinned by a thriving battery innovation ecosystem. The strategy was developed with the UK Battery Strategy Taskforce, drawing on the Call for Evidence [footnote 78] and engagement with businesses and stakeholders.

What is the Advanced Manufacturing Plan & UK battery strategy?

The UK has a proud manufacturing heritage. The Advanced Manufacturing Plan and UK Battery Strategy are a major step forward in ensuring its continued long-term success. I shall place copies of the Advanced Manufacturing Plan and the UK Battery Strategy in the Libraries of the House.

Why do we need a UK battery strategy?

We are seeking views on our proposed work for a UK battery strategy to ensure we have access to the widest possible evidence and perspectives. The UK government expects battery design, development, manufacturing, and recycling to play an essential role in meeting our net zero targets.

Is the UK a good place to start a battery manufacturing business?

B) In November 2023, the UK published its Advanced Manufacturing Plan ('the Plan'), which includes a £4.5 billion package of targeted funding for manufacturing, tax cuts and business environment measures to make the UK the best place to start and grow a manufacturing business - including battery manufacturing.

The UK is incentivising the growth of battery repurposing, reuse, and recycling to create a closed-loop supply chain for battery manufacturing, increasing sustainability and reducing reliance...

The Enhanced Capital Allowance (ECA) scheme for Energy Saving Technologies allows businesses to write off 100% of their investment in those energy saving technologies that are ...

STOCKHOLM, Nov 22 (Reuters) - Sweden's Northvolt said on Thursday it will seek U.S. Chapter 11 bankruptcy protection as the cash-strapped battery start-up seeks to sort out its finances. The company went in

a matter of months this year from being Europe's best shot at a home-grown electric-vehicle battery champion to racing to stay afloat, hobbled by production problems and ...

Consultation boards will be available on this webpage on the day of the consultation. Further information relating to the proposed development may be obtained by contacting Montagu Evans by post at 4th Floor, Exchange Tower, 19 Canning Street, Edinburgh, EH3 8EG, by phone on +44 (0) 131 229 3800, or by email at .

Through the consultation, ARENA is seeking feedback on market readiness, and design of the program. The draft Program design also proposes that funding could be provided by either production-linked payments or capital grants, depending on the needs of the Project. Consultation is now open, with submissions due by 10am, Monday 7 October 2024.

The UK government expects battery design, development, manufacturing, and recycling to play an essential role in meeting our net zero targets. A thriving battery ecosystem ...

While some work has been done to reduce the existing queue, 61 GW of battery projects have connection dates to 2030 in the transmission connection queue alone. This represents over twice the 27 GW needed by 2030 based on the CP30 Further Flex & Renewables Pathway. The current queue process works on a "first-come, first-served" basis.
