

## **Currently completed energy storage projects across the country**

Which energy storage system will be Scotland's largest?

Image: Apatura Energy. Energy storage specialist Apatura has gained planning approval for a 700MW battery energy storage system (BESS) in Inverclyde, Scotland. Once completed, the Auchetiber BESS will be Scotland's largest standalone BESS, while also marking the largest project Apatura has received approval for across its 10GW pipeline.

Which energy storage projects have been sold to Foresight Energy Infrastructure Partners?

In May last year, it sold two battery energy storage system (BESS) projects in southern England to Foresight Energy Infrastructure Partners: Sundon BESS, a 49.5MW project north of London that will connect with National Grid's Energy Park initiative; and Warley BESS, a 57MW project in Essex. Both sites have grid connection dates in 2024.

How much funding will UK energy storage projects receive in 2022?

This announcement follows the £32.8 million funding awarded to 5 UK energy storage projects across the country in November 2022 to create first-of-a-kind prototypes of their technology. A total of £69 million of funding has been awarded so far through this programme, helping to drive innovative technologies such as energy storage.

Where are UK solar and battery storage projects based?

UK solar and battery developer Renewable Connections and project partner European Energy UK sold two co-located solar and battery storage projects based in Scotland - one at Strathruddie Farm and one at Montreathmont Moor - with an aggregate combined capacity of 121MWdc (67MWac) in April last year.

What are Europe's 'two biggest battery storage facilities' in central Scotland?

In January 2022, Amp Energy revealed plans for what it described as Europe's "two biggest battery storage facilities" in central Scotland. The 800 MW battery portfolio, called the 'Scottish Green Battery Complex', will comprise two 400MW battery facilities - in Hunterston and Kincardine - and provide 800MWh of energy storage capacity.

Which UK battery storage projects will be commercially operational in 2024?

Energy storage developer Eku Energy is building two UK battery storage projects - with a combined capacity of 130MWh - in Basildon, Essex and Loudwater, Buckinghamshire. Both projects are expected to be commercially operational by the end of 2024.

There has been a shift in the pipeline for current and future long duration electricity storage (LDES), from over 7.2GW in December 2023 to 10.5GW in May 2024. In ...

## **Currently completed energy storage projects across the country**

The graphic above shows the submitted capacity of energy storage projects by co-location and by quarter; the total pipeline has now reached 61.5GW across 1,310 sites. After ...

Energy storage will fundamentally underpin the energy transition, enabling the shift to renewable zero carbon electricity system. In order to the deliver both UK Government's "British Energy ...

Energy storage projects will become central in the renewable energy sector with more green capacity, supportive policies, financial incentives, lower battery prices, and rising demand. Battery prices are decreasing, and ...

The UK currently has over 1GW of storage in operation and an ever-growing pipeline of projects across the country. Commenting on the launch of the new projects, Tim Mortlock, Chief Operating Officer at SMS, said: "With ...

Likewise, since entering the project development business in 2010, Canadian Solar has developed, built, and connected around 9.3 GWp of solar power projects and over 3 GWh of battery storage projects across the world. ...

EDF Renewables has completed the acquisition of a second battery energy storage project in Poland, with a capacity of 120 MW, increasing its total storage capacity in the country to 170 MW. Construction of the new facility will start in ...

The Ruien Energy Storage project is W&#228;rtil&#228;'s first in Belgium and one of the largest systems in the country to-date. The 25 MW / 100 MWh energy storage system helps the customer to ...

The energy industry welcomes the ambition behind the Clean Power Action Plan because it can accelerate the benefits that will be felt by people across the country through increased energy security ...

NatPower UK is currently developing a large 60 GWh battery storage pipeline as part of plans to significantly scale the crucial energy transition technology across the country.

RWE Renewables" first European battery energy storage system (BESS) - an 8.5MWh project - has gone live in Dublin, Ireland. The battery is set to provide balancing services to the Irish grid to help it integrate ...
