

Demand for lithium batteries in recent years

Why did automotive lithium-ion battery demand increase 65% in 2022?

Automotive lithium-ion (Li-ion) battery demand increased by about 65% to 550 GWh in 2022, from about 330 GWh in 2021, primarily as a result of growth in electric passenger car sales, with new registrations increasing by 55% in 2022 relative to 2021.

What is the demand for lithium-ion battery cells?

Industry-specific and extensively researched technical data (partially from exclusive partnerships). A paid subscription is required for full access. The global demand for lithium-ion battery cells is forecast to increase from approximately 700 gigawatt-hours in 2022 to 4,700 gigawatt-hours in 2030.

When will lithium-ion batteries become more popular?

It is projected that between 2022 and 2030, the global demand for lithium-ion batteries will increase almost seven-fold, reaching 4.7 terawatt-hours in 2030. Much of this growth can be attributed to the rising popularity of electric vehicles, which predominantly rely on lithium-ion batteries for power.

What is the global market for lithium-ion batteries?

The global market for Lithium-ion batteries is expanding rapidly. We take a closer look at new value chain solutions that can help meet the growing demand.

How has demand for lithium-ion technology changed over the last 10 years?

Data collected by Bloomberg shows how demand for the lithium-ion technology in electric vehicles and energy storage has started to quickly increase over the last 10 years. The cumulative demand, at just 0.5 gigawatt-hours in 2010, has soared to roughly 526 gigawatt hours in 2020.

Are lithium-ion batteries the future of consumer technology?

According to Bloomberg, energy companies like Exxon Mobil have been working on lithium-ion batteries for decades. While their focus has been on automotive applications, many consumer technology products wouldn't exist without this pivotal advancement in battery power.

Dublin, Sept. 25, 2024 (GLOBE NEWSWIRE) -- The "Lithium-Ion Battery Market - Forecasts from 2024 to 2029" report has been added to ResearchAndMarkets's offering. The market for ...

The global demand for raw materials for batteries such as nickel, graphite and lithium is projected to increase in 2040 by 20, 19 and 14 times, respectively, compared to 2020. China will continue to be the major supplier of battery ...

Known for their high energy density, lithium-ion batteries have become ubiquitous in today's technology

Demand for lithium batteries in recent years

landscape. However, they face critical challenges in terms of ...

For lithium-ion batteries, silicate-based cathodes, such as lithium iron silicate ($\text{Li}_2\text{FeSiO}_4$) and lithium manganese silicate ($\text{Li}_2\text{MnSiO}_4$), provide important benefits. They are safer than ...

lithium ion batteries: a review+ Hyuntae Baea and Youngsik Kim *ab The consumption of lithium-based materials has more than doubled in eight years due to the recent surge in demand for ...

"Demand for lithium worldwide in 2020, with a forecast for 2025 and 2030, by application (in 1,000 metric tons of lithium carbonate equivalent)." Chart. September 10, 2021.

In 2020, the total demand for lithium worldwide amounted to 292 thousand metric tons of lithium carbonate equivalent. It is forecast that by 2030 this quantity will increase to approximately...

In this blog, we touch on the most recent trends in demand for lithium, cobalt, and nickel-what the future might hold for the electric vehicle market in 2025-and go through the ...

The cumulative demand, at just 0.5 gigawatt-hours in 2010, has soared to roughly 526 gigawatt hours in 2020. That enormous increase is only expected to continue, with demand predicted to reach...

In recent years, the demand for lithium-ion batteries in stationary storage applications has doubled from 7% in 2020 to 15% in 2024, making it the fastest growing battery demand market.

Automotive lithium-ion (Li-ion) battery demand increased by about 65% to 550 GWh in 2022, from about 330 GWh in 2021, primarily as a result of growth in electric passenger car sales, with new registrations increasing by 55% in 2022 ...
