It protects the battery: When the battery reaches 100% charged and the AC adapter is plugged in, then the battery stops charging as this helps to prevent the battery from constantly charging/discharging, which impacts battery life. The battery resumes charging once the battery has dropped to 94%.

Djibouti battery pack The way the power capability is measured is in C's. A C is the Amp-hour capacity divided by 1 hour. So the C of a 2Ah battery is 2A. The amount of current a battery "likes" to have drawn from it is measured in C. The higher the C the more current you can draw from the battery without exhausting it prematurely. Lead acid

In 2020, Djibouti imported \$7.55M in Electric Batteries, mainly from China (\$2.9M), South Korea (\$1.12M), United Arab Emirates (\$954k), United States (\$565k), and Indonesia (\$543k).
