

# Does the lamp holder use batteries or power supply

What does a lamp holder do?

They hold light bulbs in place and provide an electrical connection to power them. Some light sockets include a switch to power on the bulb while others do not. Lamp holders come in a variety of shapes and sizes and sometimes support other accessories or parts of the fixture such as light shades.

What is a switched lamp holder?

Switched lamp holders feature built-in power switches as an alternative or addition to the main lamp switch. The technique required for fixing bulbs into lamp holders varies according to bulb type and lamp holder mount - i.e. the type of connection. Push-fit mounts are used on bayonet cap (BC) lamp holders and bulbs.

Do light sockets have a switch?

Some light sockets include a switch to power on the bulb while others do not. Lamp holders come in a variety of shapes and sizes and sometimes support other accessories or parts of the fixture such as light shades. They have several alternative names, including light sockets, lamp fittings, light holders, and bulb holders.

What does a light socket do?

These lighting components are a familiar feature of every home, factory and office. They hold light bulbs in place and provide an electrical connection to power them. Some light sockets include a switch to power on the bulb while others do not.

What are the different types of lampholders?

Linear lampholders are specified by contact type, lamp base, lamp contacts, lamp type, and mounting style. Choices for contact type include automatic lock, lamp lock, plunger, stationary, straight-in double edge, and turn. Miscellaneous fluorescent lampholders are typically plug-in products with a circle-line lamp base and 4-pin contacts.

How do you put a light bulb in a lamp holder?

Insert the bulb into your lamp holder and turn carefully. Most ES bulbs have right-hand threads and so require a clockwise motion, but left-hand threads are also available. Some bulb holders may be situated on a ceiling or placed at an angle in a bracket.
