

Does the water valve have a battery How to connect the power supply

How does the Surestop I-water control water valve work?

The Surestop i-water control water valve and remote unit is battery operated and has been designed to easily integrate into domestic plumbing systems. Utilising smart technology via the Surestop app on a phone or tablet, mains water can be turned off by swiping right anytime, from any place and anywhere.

How does a PEVEKO Smart Valve work?

A PEVEKO Smart Valve automatically shuts off the water supply as soon as it detects leaking water through its sensors. The sensors, which are small and wireless, are typically placed on the floor or other contact points. It doesn't matter if a pipe leaks or a hose breaks; the valve responds to the signal sent by the sensor.

How does a PEVEKO Smart Valve work remotely?

The PEVEKO Smart Valve can be remotely operated via your mobile. It eliminates the need for phone neighbors, long drives to your cottage, or returning from your holiday. The valve is even functional during power outages, thanks to its integrated backup battery. A reliable solution.

Where can I install a PEVEKO Smart Valve?

The PEVEKO Smart Valve can be installed on any hot or cold water distribution line in your home. It is certified for drinking water and is designed for temperatures of up to 90°C. The best location is on the main water supply line or before an appliance that you want to protect. Includes back-up battery (for up to 12 hours work).

How does a watersavers shut off valve work?

Watersavers' brass solenoid shut off valves enable a water supply to be turned on by energising the coil of the valve with 240v AC (SVM range). When de-energised the valve will close - shutting off the water supply. Where do I plumb this in?

How to control a water valve without internet?

PEVEKO Smart valves can be controlled without an internet connection using a remote control module or an SMS messaging GSM module. You will be able to ensure the valve is in the open or close position. The valve is also equipped with limit indicators and reports its position to your mobile device, helping you avoid paying for water that wasn't used.

The Surestop i-water control water valve and remote unit is battery operated and has been designed to easily integrate into domestic plumbing systems. Utilising smart technology via the Surestop app on a phone ...
