

El Salvador Energy Solar Street Light Average Price

How much electricity does El Salvador produce a year?

Gross electricity generation in 2006 was 5,195 GWh, of which 40% came from traditional thermal sources, 38% from hydroelectricity, 20% from geothermal sources, and 2% from biomass. In 2006, total electricity sold in El Salvador was 4,794 GWh, which corresponds to 702 kWh annual per capita consumption.

What is El Salvador's energy sector like?

El Salvador's energy sector is largely focused on renewables. El Salvador is the largest producer of geothermal energy in Central America. Except for hydroelectric generation, which is almost totally owned and operated by the public company CEL (Comisi3n Hidroel3ctrica del R3o Lempa), the rest of the generation capacity is in private hands.

Is there a solar map of El Salvador?

A solar map of the country is also under development. Currently, there are two geothermal facilities in operation in El Salvador, the 95 MW Ahuachap3n, and the 66 MW Berlin plant. Majority state-owned power company LaGeo, formerly Gesal, operates the two plants.

Is biomass a good energy source in El Salvador?

Traditional biomass - the burning of charcoal, crop waste, and other organic matter - is not included. This can be an important energy source in lower-income settings. El Salvador: How much of the country's energy comes from nuclear power? Nuclear energy - alongside renewables - is a low-carbon energy source.

Is El Salvador a geothermal country?

El Salvador is also one of the countries included in the SIEPAC project, which will integrate the electricity network of the country with the rest of the Central American region. El Salvador is the country with the highest geothermal energy production in Central America.

How many hydroelectric plants are there in El Salvador?

The public company CEL (Comisi3n Hidroel3ctrica del R3o Lempa) owns and operates 97% of the capacity. The four hydroelectric plants in El Salvador are: 5 de Noviembre (81.4 MW), Guajoyo (15 MW), Cerr3n Grande (135 MW), and 15 de Septiembre (156.3 MW), all of them on the Lempa River.
