

Is energy storage a good choice for UK homeowners in 2024?

As a sector, it's been growing steadily to become the most popular combination for UK homeowners in 2024. In addition to solar PV, energy storage provides low-cost, sustainable power for homes and businesses, and it is also cost-effective for standalone systems.

What can I do with my stored solar energy?

Use your stored solar energy to power your home, or sell it to us for our exclusive customer rate of 20p per kWh. 2 And in the darker months, we'll charge your battery with off-peak power, so you can still save money when the sun's not shining. Charge your battery for 10p per kWh, when it's not storing solar.

What types of battery storage are available?

Complementary products to support your installation. From single-phase storage to three-phase commercial storage, we have every type of battery storage available. We have a strong portfolio of storage brands, find out more. View the latest offers across our full product portfolio. Complementary products to support your installation.

Chen is leading the vertically integrated solar PV manufacturer's efforts in the US battery energy storage system (BESS) market through its brand Trina Storage. Trina Solar is one of the world's best-known solar brands, established over 27 years ago, which means it has been in business longer than the 25-year warranty period for PV modules.
