

Are batteries regulated in the EU?

Since 2006, batteries and waste batteries have been regulated at EU level under the Batteries Directive. The Commission proposed to revise this Directive in December 2020 due to new socioeconomic conditions, technological developments, markets, and battery uses. Demand for batteries is increasing rapidly.

What does the new EU Regulation mean for batteries & waste batteries?

The Council today adopted a new regulation that strengthens sustainability rules for batteries and waste batteries. For the first time EU law will regulate the entire life cycle of a battery - from production to reuse and recycling - and ensure that batteries are safe, sustainable and competitive.

What are EU rules on batteries?

EU rules on batteries aim to make batteries sustainable throughout their entire life cycle- from the sourcing of materials to their collection, recycling and repurposing.

What does the new batteries regulation mean for the environment?

To minimise the environmental impacts of this growth and considering changes in society, new technological developments, markets and the uses of batteries, the European Commission proposed a new Batteries Regulation in 2020. The Regulation entered into force on 17 August 2023 and repeals the Batteries Directive (Directive 2006/66/EC).

Who is responsible for ensuring battery compliance in the EU?

These rules are applicable to all batteries entering the EU market, independently of their origin. For batteries manufactured outside the EU, it will be the importer or distributor of the batteries into the EU that needs to ensure compliance of the batteries with the relevant requirements set out in the Regulation. via notified bodies.

When did the European Commission propose a regulation on batteries?

The European Commission presented a proposal for a regulation on batteries on 10 December 2020. The Council adopted a general approach on 17 March 2022. The European Parliament adopted its negotiating position in the plenary on 10 March 2022.

The new Batteries Regulation will ensure that, in the future, batteries have a low carbon footprint, use minimal harmful substances, need less raw materials from non-EU countries, and are collected, reused and recycled ...

The first set of regulation requirements under the EU Battery Regulation 2023/1542 will come into effect on 18 August 2024. These include performance and durability requirements for industrial batteries, electric vehicle ...

The Batteries Regulation is the first European legislation that considers the full life cycle of batteries,

including sourcing, manufacturing, use, and recycling, all in a single law. This aligns with the European Green Deal's ...

What is the EU Batteries Regulation? The EU Batteries Regulation, which took effect on 17 August 2023, is a landmark legislation that replaces the 2006 Batteries Directive, which ...

o Regulation (EU) 2023/1542 of the European Parliament and of the Council of 12 July 2023 concerning batteries and waste batteries, amending Directive 2008/98/EC and Regulation (EU) ...

The European Parliament and the Council adopted the new Batteries Regulation on 12 July 2023. This will minimise the environmental impact of this exponential growth in light ...

The EU Battery Regulation encompasses a comprehensive set of rules and requirements established by the European Union (EU). On July 28, 2023, the EU Commission published the ...

lithium batteries are introduced, in light of the importance of lithium for the battery value chain. In addition, specific recovery targets for valuable materials - cobalt, lithium, lead and nickel - are ...

EU's battery industry lags behind in global competition. 05-07. EU stakeholders role in supporting the battery value chain. 08. Member state financial support for battery producers is subject to ...

BRUSSELS, Belgium - A provisional agreement on the overhaul of the EU battery regulations has been reached by the European Parliament and Council. ... the Netherlands - The phenomenon ...

The agreed rules will cover the entire battery life cycle, from design to end-of-life and apply to all types of batteries sold in the EU: portable batteries, SLI batteries (supplying ...
