

What is Finnish battery industries?

Finnish Battery Industries is the first association in the world representing companies in the battery value chain. Our members cover the battery value chain from mining and refining to the recycling of batteries. The association is a part of the Finnish Chemical Industries.

Who makes Celltech batteries?

Celltech is Finland's leading designer and manufacturer of battery systems and an importer of special batteries. Together with Nordic sister companies, Celltech Group is the largest player in the field in the Nordic countries. Celltech Group is a part of the Swedish technology group, Addtech AB.

Why is the battery industry growing in Finland?

The battery industry is a rapidly growing field in Finland, and together with already functioning factories, there are several large investments taking place in the near future. Finland has essential minerals which are needed in battery production.

Why should you invest in a lithium battery in Finland?

Lithium is essential to reducing global CO₂ emissions. Located in Finland, the Keliber project is strategically positioned close to critical and growing regional end-user battery markets for lithium hydroxide in Europe. Finland's reliable and sound economic and social infrastructure make the country an attractive investment destination.

Where is Valmet battery made?

Valmet Automotive has officially opened its Uusikaupunki, Finland battery plant, marking the start of production of high-voltage automotive battery modules and battery packs, part of a significant expansion of its electric vehicle battery-related manufacturing.

How many people work at Uusikaupunki battery plant?

Currently, the Uusikaupunki battery plant employs around 200 people in the initial stage of production. The factory headcount is expected to substantially rise, with around 500 people planned to be working at the Uusikaupunki battery plant by 2024.
