

## Get the energy storage device and open it Strict inspection ahead

How do you use energy storage devices in Genshin Impact?

Players must collect three Energy Storage Devices and use them on three different Terminals to remove the barriers blocking the Research Terminal. The step is quite simple and easy to follow as the Research Terminals are marked on the map in Genshin Impact.

How do I activate all the energy storage terminals?

So, let's see what steps you need to take to activate all the terminals: Research Terminal #1: Take the first Energy Storage Device and move forward and to the right. You'll have practically no other options, so you'll know where to go right away.

How do you find the last energy storage device?

Place the energy storage device near it and break the second seal, which will open more paths. Once that is done, go back to your original spot to pick up the last device. After collecting the third energy storage device, go straight and turn left at the end. You will find the last research terminal near a broken mine car.

How to pick up energy storage devices?

The order in which the barriers should be dealt with is as follows: first the right barrier, then the left barrier, and finally the one positioned in the middle. First, approach one of the Energy Storage Devices and select the option to Pick Up. Hastily proceed straight ahead and make a right turn.

Where can I find the energy device?

To find the Energy Device, you must first pick it up, which is hidden behind a Geode. Once you have the Energy Device, the timer will start, and you need to find the corresponding terminal within the time limit. Be sure to avoid the floating circles as they will reduce the timer by 30 seconds. Follow this exact path to find the terminal.

How do you remove energy storage barriers?

There are three barriers that players can remove in a specific order, which are right, left, and then the one in the middle. First, approach one of the Energy Storage Devices and press Pick Up. Quickly run straight ahead then turn right.

Pumped storage is still the main body of energy storage, but the proportion of about 90% from 2020 to 59.4% by the end of 2023; the cumulative installed capacity of new type of energy storage, which refers to other types of energy storage in addition to pumped storage, is 34.5 GW/74.5 GWh (lithium-ion batteries accounted for more than 94%), and the new ...
