

What can a company do in Guinea?

There is great potential for companies which could contribute to Guinea's infrastructure development, including railroads, ports, and roads. Due to Guinea's favorable climate and geography, there is also considerable potential for growth in its agricultural and fishing sectors.

Why should you invest in a hydroelectric project in Guinea?

Investment opportunities in hydroelectric projects are growing, as Guinea's abundant rainfall and numerous rivers have the potential to generate enough electricity to power Guinea, and potentially its surrounding neighbors. Guinean consumers generally prefer goods and services from the United States and Europe.

Could Guinea's Kissidougou area be a lithium mine?

Previously best known for its diamonds, Guinea's Kissidougou area near the border with Sierra Leone has shown enough potential to convince one company to explore for lithium there. On 20 April, Global Mining Ressources filed an application for a permit to assess the lithium potential of the area.

Which companies are targeting lithium in Conakry?

Around the same time, from late March to early April, three separate companies that appear to be targeting lithium were registered in Conakry: Guinea Lithium, African Lithium Mining Resources Guinea and Guinean Lithium Ressources.

How did the inauguration of a president affect international investment in Guinea?

The return of political stability and the inauguration of a democratically elected president in 2010 facilitated an era of international investment in Guinea. New mining projects, a port expansion, hotel construction, and other infrastructure projects attracted new capital and boosted demand for goods and services across multiple sectors.

Will Guinea grow in 2023?

Guinea returned to growth in 2016, fueled largely by expanding bauxite exports. Despite the COVID-19 pandemic, subsequent supply chain challenges, and the September 2021 coup d'état, Guinea remains on track for a 5.6 percent growth for 2023.

Roger Hollies, CTO at Arenko Group, posted on LinkedIn that 1.5GW of batteries across NESO's network were able to inject power into the grid during the disruption, including 12 batteries on Arenko's Nimbus platform. ...
