

What if batteries are deemed hazardous?

Importantly, if batteries are deemed hazardous, their status will need to be highlighted before a waste collection. Hazardous and non-hazardous waste can't mix during disposal. Mixing hazardous waste in with non-hazardous waste is prohibited by the Hazardous Waste Regulations.

Are batteries hazardous waste?

Batteries definitely fall under the category of hazardous waste. In February 2010, the UK Environment Agency created battery waste regulations. These regulations ensured that battery waste was disposed of safely and securely. Following these legislations many small businesses who sell batteries were given in-store battery disposal collection bins.

What are the waste batteries regulations?

These Regulations set out requirements for waste battery collection, treatment, recycling and disposal for all battery types including arrangements by which the UK intends to meet waste portable battery separate collection targets of 25% by 2012 and 45% by 2016.

What causes battery waste?

The main cause of battery waste is simply when it runs out of power. For single-use batteries such as alkaline and zinc batteries used in TV remotes, torches, and toys, eventually they reach the end of their lifespan and have no further use. Rechargeable batteries may also reach a point when they can no longer be recharged.

Are portable batteries dangerous?

The most popular type of portable battery - Alkaline - is not classed as hazardous or dangerous. However, a container full of mixed waste batteries is almost certain to contain a small number of batteries that are deemed to be dangerous and/or hazardous. Therefore all mixed waste batteries must be transported and stored as special waste.

Where can I dispose of old car batteries?

If you've got an old car battery you could drop it off at your local garage. Otherwise, check if your nearest household waste recycling centre (HWRC) accepts the types of battery waste you have. Businesses must arrange the collection of any waste batteries by licensed waste carriers, as they're a type of commercial waste.
