

How long do solar panels last?

Research has shown that the carbon payback period for solar panels is on average 1-4 years.⁹ This means that over a solar panel's lifetime - typically 30 years¹⁰ - it will generate zero-carbon and zero-pollution electricity for decades after any carbon emitted during its production has been paid back.

Do I need to tell my electricity supplier about my solar panel?

In many regions, some legal requirements or regulations mandate informing your electricity supplier about your solar panel installation. Failing to do so may result in legal complications or fines. How can I report changes to my solar panel system to my electricity supplier?

Why should I notify my electricity supplier about my solar panel installation?

By notifying your electricity supplier about your solar panel installation, you contribute to transparent communication, accurate billing, and efficient grid management. This openness helps both you and your supplier make the most of your solar energy system while ensuring a reliable and sustainable energy future.

How do I inform my electricity supplier about my solar panel installation?

Transparent Communication: Informing your electricity supplier about your solar panel installation is a matter of transparent communication. Your electricity supplier needs to be aware of your solar panels so they can manage the electricity flow effectively. This helps ensure a smooth and reliable energy supply for your home.

Do solar panels need to be changed over 25 years?

The one component that will probably need changing over the 25-year lifespan of the panels is the inverter (which converts the DC output of a photovoltaic panel into the AC required by local and commercial power grids), which costs an average of £1,000. Solar panels are exposed to dirt, debris and pollution.

How far can solar panels be installed?

For pitched and wall-mounted installations, solar panels must not extend more than 200mm perpendicular to the surface of the roof or wall. For both pitched and flat roof installations, panels must be installed at least 1 meter away from the building's external edges.
