

How to check whether the battery has been replaced

How do I know if my phone battery has been replaced?

Scroll down to "Battery" and look for the "Serial Number." Please take note of this serial number and verify it with Apple's official database. If the serial number doesn't match the expected value for your device, there's a chance the phone battery has been replaced.

How do I know if my iPhone battery is fake?

To know if the battery inside your iPhone is original or fake, navigate to Settings > General > About and look for the status of "Parts and Service History": Genuine Apple Part - It denotes your iPhone's battery has been replaced with a genuine Apple part and processes.

How do I know if my iPhone has a bad battery?

Unknown Part - If a local or unauthorized component is used, "Unknown Part" will appear next to it. Missing Section - If the iPhone hasn't been repaired, this section won't appear. The usual way to check an iPhone's maximum battery health is via the "Battery Health & Charging" menu.

How do I know if my iPhone 11 has a battery?

On an iPhone 11 this is limited to the battery and display, and on the iPhone XR, XS (and Max), and iPhone SE, only the battery will be listed. Any parts that read "Genuine Apple Part" are first-party and have been replaced by Apple or one of their authorized service partners. For any other parts, you will see an "Unknown Part" label instead.

How do you check a battery?

Use a multimeter or voltmeter to check your battery. Put either device on DC voltage if it's digital. Place the end of the black probe on the negative terminal and the end of the red probe on the positive terminal. Watch the readout on the multimeter. You should be looking at volts on your reader.

How do I know if my iPhone battery has a serial number?

Check the Battery Serial Number Every iPhone battery comes with a unique serial number. You can find this information by navigating to Settings, selecting "General," and then tapping "About." Scroll down to "Battery" and look for the "Serial Number." Please take note of this serial number and verify it with Apple's official database.

Again, if this is the case, you DO NOT need to replace your battery. Note: for this method to work, you must have a battery tester that can perform a battery capacity test, not just a ...
