

# How to deal with leaks in rooftop solar panels

Can you fix a roof leak under solar panels?

When faced with a roof leak under your solar panels, it's important to take immediate action to prevent further damage to your roof and home. Fixing a roof leak under solar panels requires careful attention to safety precautions and following the proper steps to resolve the issue.

Why is a roof leak under solar panels important?

Addressing roof leaks under solar panels is essential for several reasons. First and foremost, a roof leak can cause significant damage to your home if left unattended. Water can seep through the roof and damage the underlying structure, leading to rot, mold growth, and compromised stability.

Can solar panels be installed on a roof?

Most modern roofs are compatible and able to withstand the installation of solar panels, but in some cases, the roof material is susceptible to leaks. If your roof is made from clay, terracotta, wood shingles, or slate, there is an increased risk of leaks developing through the installation.

What should I do if my roof leaks?

While you can check the roof for debris or damage, your best bet is to call your installer immediately. There could be any number of causes for a leak, including damage caused by walking on the roof, dragging solar panels, or having a tile break in the underlayment.

Why do solar panels leak?

Older roofs or roofs with existing damage may be more susceptible to leaks under the added weight and penetration of solar panels. Flashing issues: Flashing is used to create a watertight seal around roof penetrations such as vents, chimneys, or skylights. If the flashing is damaged or improperly installed, it can cause water to seep in.

How do I seal a leak under my solar panels?

Applying sealant is a temporary solution that can help to seal small gaps or cracks in the roof under your solar panels. This can be particularly useful when you have identified the source of the leak and it is accessible. Here are the steps to follow when applying sealant:

Still, the possibility of roof leaks due to solar panels is here. The common reasons are: Incompatible roof with solar panels. When rooftop solar panels are installed, drilling into the rafters is part of the process.
