How do I install a battery storage system?

install battery storage systems
INSTALL YOUR SYSTEM
The first thing to do when having a battery storage system installed is to ask to see the installer's Clean Energy Council Accredited Installer card. This shows that the installer

How do I choose a home battery storage system?

Let's start with the battery - the muscle behind your home battery storage system. The size of the battery you install depends on your energy needs. A detached house with five people will likely use more energy than a small 1-bedroom flat with two people. Make sure you do your research before choosing a home battery that's right for you.

Should you install a home battery?

The whole point of installing a home battery is to cut your bills and your carbon emissions. That makes your ability to monitor your home battery and your overall energy usage all the more important. Most home batteries will come with some form of energy monitoring software - apps, portals and the like. The batteries work without it.
