

How to see where the original battery is produced

How do you know if a battery has a production date?

Every battery's production date is etched on to it, usually on a side edge or negative terminal of the battery. The manufactory date contains 4-6 digits on average. However, the production date happens to be a bit tricky. Instead of using plain dates, the manufacturers incorporate code like digits for the production date.

How do I know if a battery was made?

For example, if the date on the battery is 01/04/19, that means the battery was manufactured on April 1st, 2019. If you can't find the sticker, or if the date on the sticker is illegible, you can also check the date code stamped into the side of the battery case. This code will be four numbers followed by two letters.

How to find the date of manufacture of an automobile battery?

Brief document on how to locate the date of manufacture of an automobile battery, some have it silkscreened in the superior part in a lateral part, some in a terminal with die-cut numbering, but the majority of batteries have it indicated in the worst place and the most uncomfortable and complicated to review, IN THE BASE OF THE BATTERY.
