How to find the value of a capacitor in farads?

Or we can find the value of the capacitor in Farads by knowing the applied frequency and its reactance value at that frequency. What will be the value of a capacitor in farads when it has a capacitive reactance of 2000 and is connected to a 50Hz supply.

What are the different types of capacitors?

Capacitors consist of 2 metal plates that are separated by a dielectric (non-conductive electrical insulator). Some of the most common dielectrics used are Electrolytic, Ceramic, & Film. The different plate and dielectric materials allow for a variety of capacitor types that can be specialized for specific functions and uses.
