

Iran adds subsidies for new energy batteries

What is Iran's energy subsidy system?

Iran has had a direct subsidy system to reduce the price of fuel, and some food, in place for decades. Estimates for the scale of energy subsidies in Iran have varied significantly, but they are frequently cited as the largest in the world. The IEA estimates they account for around 15% of the nation's GDP.

Will Iran retender solar power?

Iran's Renewable Energy and Energy Efficiency Organisation (SATBA) has announced plans to retender 2.2 GW of solar power capacity during the current Iranian fiscal year (March 21st-March 20th), after disappointing take-up of the original offering.

What is Iran's subsidy reform plan?

Iran's Supreme Leader has backed the government's subsidy reform plan. According to the Iranian government, \$100 billion is spent on subsidies each year. The reform plan aims to encourage public transport by decreasing fuel subsidies. Iran spends the largest share of GDP on fossil fuel subsidies in the world.

How much money does Iran get from oil & natural gas subsidies?

According to the IMF, until recently a four-member Iranian household received an average of \$4,000 a year in subsidies for oil and natural gas, compared with a typical annual income of about \$3,600 a year.

Will Iran's subsidy reforms save 20 percent of its budget?

In March 2010, the Iranian Parliament approved a \$347 billion budget, in which the allocation from subsidies and the oil price were set at \$20 billion and \$65 per barrel, respectively. According to the Vice President for Parliamentary Affairs, Iran's subsidy reforms would save 20 percent of the country's budget. [citation needed]

Why is Iran consuming so much gas a year?

Subsidizing fuel prices has been the primary factor accounting for a 500 percent rise in Iran's domestic energy consumption over the past three decades, while the size of the population has doubled over the same period. Iran's gasoline and gas-oil production and consumption projection (2008-2012)
