When a solar company goes offline, capacity comes offline, meaning less-efficient companies are closing down. Here's an incomplete list of solar firms that have closed down, either by closure, bankruptcy, or fire-sale acquisition:

How do higher interest rates affect solar contractors?

Higher interest rates have made borrowing more expensive, discouraging consumers from investing in solar energy systems. This drop in consumer demand hit solar contractors hard, as their business model relies heavily on a steady flow of new installations.

The solar industry has grown rapidly in response to rising global demand for clean, renewable energy sources. From the early 2000s, solar adoption in residential and commercial sectors accelerated, fueled by falling costs of solar panels, government incentives, and heightened environmental awareness.
