

What is a risk assessment for lithium-ion batteries?

The risk assessment applies to the use, handling, and storage of lithium-ion batteries. PCBU's must develop safe work procedures for handling and using lithium-ion batteries. These procedures should include guidelines for storage, charging, transportation, and disposal.

Are lithium-ion batteries suitable for a fire risk assessment?

For a fire risk assessment to be considered suitable and sufficient it must consider all significant risks of fire. Where lithium-ion batteries are concerned this should cover handling, storage, use and charging, as appropriate.

Are lithium-ion batteries a fire hazard?

Lithium-ion batteries used in e-bikes can pose a serious fire risk through a process known as thermal runaway. At least 10 fatalities occurred in fires started in e-bikes or e-scooters powered by lithium-ion batteries in the UK in 2023, with almost 200 fires recorded.

What are the OSHA standards for lithium-ion batteries?

While there is not a specific OSHA standard for lithium-ion batteries, many of the OSHA general industry standards may apply, as well as the General Duty Clause (Section 5(a)(1) of the Occupational Safety and Health Act of 1970). These include, but are not limited to the following standards:

How do you manage the risk of a lithium-ion battery fire?

Managing the risk of lithium-ion battery fires is crucial. PCBU's and workers can help mitigate the risk of a lithium-ion battery fire by following these basic guidelines. Ensure you: regularly check the condition of the batteries for any signs of damage or swelling; and discontinue use if you notice any abnormalities. Ensure you:

Are lithium-ion batteries safe?

It's important to be aware of the other safety hazards either directly linked to or potentially associated with the use, storage and /or handling of lithium-ion batteries: Electrical hazards / safety - high voltage cabling and components capable of delivering a potentially fatal electric shock.

In workplaces with lithium-ion batteries, it is important that employers ensure that an emergency action plan (EAP) includes lithium-related incident response procedures based on the ...

A symbol shown below is marked on the label of our Lithium battery. In case of coin type and thin type (pouch) battery, symbol is not marked on battery but its packaging. ... Reference; Notification designation: WARNING(CAUTION) In ...
