I am not sure the probe has been supplied but yes, the inverter expects it to be connected via CAN (normally used for lithium communication). However, in case there is not a temperature probe the inverter lets us choose between three preset temperature scenarios: hot  $\pm 45\text{ }^{\circ}\text{C}$ , warm  $\pm 25\text{ }^{\circ}\text{C}$  and cold  $\pm 5\text{ }^{\circ}\text{C}$ .

This article provides a comparison of lead-acid and lithium batteries, examining their characteristics, performance metrics, and suitability for solar applications. By analyzing these two battery technologies, we aim to equip you with the knowledge to make an informed ...
