

Why should you install a battery energy storage system in the Philippines?

BESS acts as a buffer between the grid and your facility, ensuring a consistent and reliable power supply. BESS can help keep essential appliances running in areas where power outages are common. Curious to find out how much you can save installing battery energy storage systems in the Philippines?

How is Bess transforming the Philippine energy industry?

With the commercial operations of approximately 1,000 MW of BESS facilities across 32 locations in the Philippines, we are now ushering in a new era for the Philippine energy industry through significant improvements in grid reliability and the integration of more renewable power sources to the country's diverse energy mix.

What is Masinloc battery energy storage?

We started our venture into battery energy storage technology in 2018 when we acquired the 10 MW Masinloc Battery Energy Storage System (BESS) of the Masinloc Power Plant from AES Philippines. The Masinloc BESS is the first battery energy storage facility in the Philippines and one of the first in Southeast Asia.

Who provides fractionalized battery energy storage?

We are partnered with NexVolt, the first in the Philippines to provide fractionalized Battery Energy Storage. NexVolt, through their cutting edge technology, ensures even Small Medium Enterprises (SMEs) can adopt inexpensive battery energy storage systems and kickstart their journey towards energy independence. How much does a battery energy storage system cost?

Larger facilities with higher energy demands will require more extensive and costly systems. Battery energy storage systems using lithium-ion technology have an average price of US\$393 per kWh to US\$581 per kWh. While production costs of lithium-ion batteries are decreasing, the upfront capital costs can be substantial for commercial applications.

How many Bess facilities are there in the Philippines?

We are operating BESS facilities at 32 locations in the Philippines, across the regions of Luzon, Visayas, and Mindanao. Overall, we are putting up approximately 1,000 MW of BESS facilities, which will help ensure the reliability of the grid, especially in areas that are in most need of power quality solutions.
