

Aluminum Strip. Aluminum strip is the common name for aluminum sheet and foil in rolls with a thickness > 0.2mm and a width of 20mm to 100mm. The common name for aluminium ...

Subsequent to the cold rolling process, the aluminum sheets have to undergo a heat treatment to regain formability as well as the required material strengths. Especially the heat treatment and the cooling of the strip play a major role. To increase flatness the strip has the possibility to run through a tension leveler.
