

YCZN Intelligent Capacitor is an integrated reactive power compensation device designed for 0.4kV power grids. It consists of measurement and control module, capacitor switch- ... and ...

The CDCE3 series low-voltage intelligent capacitor compensation device is a new type of compensation device that uses self-healing low-voltage power capacitors as the main body, intelligent measurement and control processors as the ...

By taking the self-healing type low voltage power capacitor as the main body and the intelligent measuring and controlling processor as the control center, the HY series intelligent ...

Shanghai Zhiyue Electric Co., Ltd. is a large-scale enterprise integrating R & D, production, trade and service with intelligent capacitors, power capacitors, intelligent reactive power ...

BTB ELECTRIC Company is a European standard electrical equipment manufacturer. We provide solutions to improve power quality; products include Capacitors, Harmonic Filter Reactors, ...

The structure mode of the existing low-voltage reactive power automatic compensation equipment has been updated, and the reliability and service life of the equipment has been greatly ...

Intelligent low-voltage power capacitor is a device used to improve power factor and efficiency of power system. It is designed to run on low voltage, usually less than 1000 volts. The ...

4. Intelligent networking. Intelligent capacitors use intelligent network technology to build CAN communication network to connect with each other or . external devices to meet the needs of ...

The CDCE3 series low-voltage intelligent capacitor compensation device is a new type of compensation device that uses self-healing low-voltage power capacitors as the main body, ...

It mainly develops and manufactures power quality products based on international advanced technology, including APF, SVG, DVR, etc., and also produces common reactive power ...

Hengyi Electric Group was founded in 1993, with registered capital of 58 million yuan, specialized in manufacturing APF, SVG, SPC, intelligent power capacitor compensation devices, ...
