

What is a camping power pack?

These are essentially large lithium batteries which can store electricity and generate AC and/or DC power to power your electrical camping gear. The best camping power packs can be trickle charged using solar panels and therefore allow you to essentially live off-grid for many days and weeks at a time if the sun is shining reasonably brightly.

Should I buy a camping power pack?

If you plan on spending a decent amount of time camping without a mains hookup, you may want to invest in a camping power pack. These are essentially large lithium batteries which can store electricity and generate AC and/or DC power to power your electrical camping gear.

How do you charge a camping power pack?

The best camping power packs can be trickle charged using solar panels and therefore allow you to essentially live off-grid for many days and weeks at a time if the sun is shining reasonably brightly. Of course you can also charge a power pack directly from the mains or your car battery if required.

What does W mean on a camping battery?

W or Watts is the power or oomph which a camping battery can supply to a gadget or appliance. For instance, if your hair dryer runs at 1800W AC, it means you need a power supply capable of supplying at least 1800W (1.8kW) of alternating current (i.e. like a regular mains supply).
