

Who makes solar controllers in China?

As one of the leading solar controller manufacturers in China, Anern has professional Research and development teams of solar pioneers, installed megawatt solar capacity in more than 200 countries and regions, providing OEM/ODM services. What does solar controller do?

Who is Sunmaster?

SunMaster as a professional solar LED lighting manufacturer currently owns its own manufacturing plants with a total area of 8000 square meters along with multiple workshops for the production of solar panels, LED lights, controllers and other system accessories. SunMaster provides high quality customized solar solutions at affordable prices.

What is a solar charge controller?

The full name of the solar charge controller is the solar charge and discharge controller, which is an automatic control device used in the solar power system to control the solar panel to charge the solar battery and the solar battery to supply power to the solar inverter load. When is it necessary to use solar controller?

Why choose Sunmaster solar lights manufacturer?

SunMaster Solar Lighting Company Limited was founded in the year of 2006; since that, SunMaster has been the most professional and reliable solar LED lights manufacturer in the global market of solar lighting products and accessories.

What are the different types of solar controller in Anern?

The main types of solar controller in Anern are MPPT solar controller and PWM solar controller. Photovoltaic battery charging controller is applied in solar power system, coordinating the work of solar panel, battery and load, which is the brain of photovoltaic system.

How does a Sunmaster solar controller work?

SunMaster's solar controller uses a photocell and/or timer to control when the light will turn on, when the sun goes down, and to turn off when the sun comes up. The photocell detects when the sun comes down and when the sun comes up again.

Apollo Solar, Inc. Apollo Solar provides a full line of inverters, charge controllers, and monitoring modules for PV power management systems. The Apollo power centers are designed for fast, fail-safe installation and feature exclusive built-in energy-performance meters together with wireless and internet-based remote data-monitoring and upgrade capabilities of every Apollo system ...
