Once the energy stored in your battery is used up, your home will once again be powered by the grid. Most modern storage batteries allow you to monitor your electricity generation and storage via an app or through an online account - some even let you access your system remotely and decide which devices you want your battery to power.

From grid-scale storage systems to smaller storage and backup options in local communities, we have the expertise to deliver your battery storage projects.

The Saudi Power Procurement Company (SPPC) has begun qualifying bidders for an enormous undertaking of four grid-scale battery projects totaling 8 GWh of storage capacity across the Kingdom.
