

How many MW will Port-au-Prince have in 2020?

In July 2020, the government announced plans to add 190 MW of generating capacity to Port-au-Prince, including 60 MW of thermal power facilities. The largest planned project was a 55 MW (60 MW installed) fuel-flexible plant. (Note: The exact amount of capacity that will be operational in 2020 is not explicitly stated in the passage, but the announced capacity is 190 MW.)

Why is Peligre a critical infrastructure in Port-au-Prince?

Peligre is a critical infrastructure in Port-au-Prince because E-power, the only other metropolitan electricity producer, is reliant on Peligre's operations. Therefore, any disruption to Peligre's operations could significantly impact Port-au-Prince's electricity production.

What happened in Port-au-Prince in 2022?

In 2022, grid instability and a lack of available electricity led to EDH (Electricité d'Haiti, the national electric utility) announcing that it could only supply 4 to 6 hours of electricity a day to its customers in the Port-au-Prince metropolitan area and was implementing power rotations for distribution.

What is the solar power plant capacity in Haiti?

The solar power plant in Haiti has a capacity of 1.2 MWp. It is located in the Commune of Jacmel, South-East Department, and is connected to the regional electricity network of Jacmel.

Why did Port-au-Prince get a blackout?

In April 2023, EDH workers at the Peligre hydroelectric dam went on a three-week strike over five months of unpaid salary arrears, resulting in a Port-au-Prince wide blackout.
