

What is a power bank?

A power bank is a rechargeable battery pack that can charge your devices on the go. They are designed to be portable, reliable, and powerful, capable of charging your device up to 50 times before needing a recharge.

Why do you need a power bank?

With a power bank in hand, you can juice up and continue to use your devices without worrying whether or not there will be outlets nearby to keep you going. Power banks, also known as portable chargers, operate in a similar fashion to your bank account, hence their name. They act as a storage facility for energy.

What is a fast charging power bank?

A fast charging power bank is exactly what its name implies: a portable charger that can juice up your devices at a much faster rate than simple wall chargers. These power banks utilize a higher voltage and essentially increase the number of watts being pumped into your device to charge it up more quickly than average.

How long does a power bank last?

The lifespan of a power bank may vary depending on various factors, such as quality, build, battery capacity, type of battery, and how the power bank is used. The average lifespan range for a power bank may be anywhere from 1.5 to 3 years or 300 to 1000 charge cycles.

How to increase the lifespan of a power bank?

To increase the lifespan of your power bank, remember to take good care of it. Here are a few useful tips to help you make the most out of your portable chargers: Do not use a power bank to charge your devices above 80%. Do not leave power banks in extremely hot or cold temperatures. Do not let your power bank reach 0%.

How much power does a Baseus Blade Laptop Power Bank have?

Our Baseus Blade Laptop Power Bank has a charging capacity of 20,000 mAh and 100W, making it an excellent source of energy for your laptop while your phone is linked up to another portable charger. When it comes to parties and small day trips, you will not need a portable charger with a huge charging capacity.
