

How much does a car battery replacement cost in the UK?

The average cost of a replacement car battery in the UK is between £100 to £400, depending on various factors like size or type, brand, quality and warranty. We'll dive into the costs for each car make and how other factors can impact your bill below.

Should I pay for a new car battery?

Yes, when you pay for a new car battery, you'll also need to pay for the mechanic's skills and time. However, labour costs are usually included in the overall garage quote. So, you shouldn't be hit with an extra fee after the job. If in doubt, check with your mechanic first.

Why are car batteries so expensive?

Many car owners are surprised by the high cost of car batteries. Several factors contribute to their high cost. One major factor is the quality of materials used in manufacturing these batteries. High-quality materials ensure that they have a longer lifespan and are more reliable than cheaper alternatives.

How much does a mechanic battery cost in the UK?

Installation - Qualified UK mechanic battery installation fees typically run between £30 to £100, although pricing varies. If you're handy, you could opt for DIY replacement to save your wallet, but remember that installation errors could further damage your vehicle and impact its resale value.

Should you sell your car battery?

However, the reality is, a poorly maintained or faulty battery can negatively impact your car's performance way before that stage. A flat or faulty battery can cause your car to fail its MOT and reduce its market value. Therefore, your car battery shouldn't be an afterthought, especially if you're wondering if you should sell your car.

How long does it take to replace a car battery?

In most cases, replacing a car battery takes between 30 minutes to an hour. However, this can be extended by up to five hours if complications arise or perhaps if there's difficulty sourcing a replacement battery, then it could be a few days.
