Inverter and Battery Installation. One of the most important parts of solar power is the inverter. This is responsible for converting DC power to AC power so it can be used in your home. It also feeds excess electricity to the grid. Our experts will choose the right inverter size for your needs, and then install it in the best place.

Remove the battery. Twist the battery compartment counterclockwise to unlock and remove the cover. Then, remove the battery and discard the orange battery insulator. Charge the battery. Plug it into a power source using the provided USB cable. Once the battery's fully charged, only one light on top will glow green. Re-insert the battery.
