

What information does qatarenergy disclose?

We disclose information for all QatarEnergy LNG operations under our direct control within the State of Qatar. This includes 16 joint venture companies. As part of our sustainability approach, we report on the topics deemed to be material by our stakeholders (based on objective, expert analysis - see page 8).

What is qatarenergy LNG's environmental strategy?

At QatarEnergy LNG, we recognise Qatar LNG's key role in the global shift towards low-carbon energy - it is why we were proud to launch an ambitious Implementation Roadmap for our Environmental Strategy in 2022.

How much CO2 will be collected in Qatar by 2035?

One of the major projects, according to QatarEnergy, is the deployment of carbon capture and storage (CCS) technology to collect over 11 million tonnes of CO2 per year in Qatar by 2035.

Is qatarenergy LNG a sustainable company?

At QatarEnergy LNG we always do what we say, we promote honest and transparent communication and conduct our business ethically. As shown on the previous page, sustainability is embedded within the company mission, and sustainability spans all six pillars of the QatarEnergy LNG Strategy Plan.

What is qatarenergy LNG doing in 2022?

Within QatarEnergy LNG, we continued to innovate to ensure exceptional standards of quality, whilst supporting reliable and efficient operations. Automating processes are part of this and in 2022 we saw a number of milestones in our digital transformation strategy.

What is the 2022 sustainability report?

We are proud to present our 2022 Sustainability Report. Covering the 2022 calendar year (ending 31 December), we provide a transparent and balanced representation of our approach, progress, and future direction. We disclose information for all QatarEnergy LNG operations under our direct control within the State of Qatar.
