have looked at generator synchronisation with mains but cant find any equipment off the shelf that does it. and not sure of how to set it up so that if grid power goes off the generator will also go off. as the generator will power any relay connected to the mains and keep it on. then there would be a few linesmen somewhere that wont be happy.

Transmission grid-connected solar projects mark "new era" The transmission grid-connected solar project is, in fact, already a reality. The UK's first transmission grid-connected solar farm has begun commercial operations, marking a new era of renewable energy development and establishing this as an emerging trend.
