Are lead acid batteries better than AGM batteries?

Lead acid batteries are an older technology--you don't have to refill them with distilled water anymore--while AGMs are modern and fit in vehicles with more advanced electrical systems. You can swap an AGM battery into a car that came with lead acid, but not vice versa. Lead acid batteries cost less, but they won't hold a charge as long as an AGM.

How many starts can a lead acid battery make?

You can expect to get around 20,000 starts from a lead acid battery, but they're not suitable for cars fitted with fuel-saving start-stop systems. What is an EFB battery?

Do lead-acid batteries cost more?

But some top-rated lead-acid batteries cost less than many of their competitors, says Frank Spinelli, who oversees testing of car batteries at Consumer Reports. "Price doesn't necessarily mean better performance," Spinelli says.
