

How do I contact San Diego's Battery energy storage systems project?

General Inquiries: Planning & Development Services [PDS.LongRangePlanning@sdcounty.ca.gov](mailto:PDS.LongRangePlanning@sdcounty.ca.gov) |(858) 505-6677 Learn more about the County of San Diego's Battery Energy Storage Systems Project.

What is a battery pack test system?

DMC's Battery Pack Test Systems facilitate battery design as well as research and development for national laboratories and research institutions. They are deployed in end of line / production test stations for battery packs developed by major automotive manufacturers and their suppliers.

Can DMC's battery pack test systems include battery pack cycling?

DMC's Battery Pack Test Systems can be designed to include battery pack cycling. Our systems can execute standard and customized charge and discharge profiles. Our Battery Pack Test Stands can be integrated into battery cyclers and power supply/DC load platforms from any manufacturer including:

Are Bess batteries safe?

The County of San Diego Fire Protection District has hired a consultant to review the current fire safety standards for BESS, which are large battery systems used to store energy. The goal was to make sure these projects are safe and follow the necessary guidelines to protect people and property.

What is DMC's modular battery test platform?

DMC's modular Battery Test Platform incorporates open software and hardware technologies, along with flexible and reliable subsystem components and instruments, in order to create systems that are completely customizable to the end user's specifications.

The entire battery pack is placed back into the vehicle. If you are in San Diego, California, Chula Vista, California, Bonita, California, La Jolla, California, La Mesa, California, or the surrounding areas, you can come to Dragonfly ...
