

Sea-going battery type classification table

What is a lithium-ion battery classification note?

This Classification Note provides requirements for approval of Lithium-ion battery systems to be used in battery powered vessels or hybrid vessels classed or intended to be classed with IRS.

What are the rules for the classification of steel ships?

Rules for the Classification of Steel Ships. Battery rooms may generally be considered as an "Other machinery spaces" for fire protection purposes. The battery room shall be enclosed by an A-0 class bulkheads and the boundary between them.

Are primary batteries rechargeable?

Primary batteries are non-rechargeable. The secondary batteries i.e. batteries which can be recharged have further variants based on the battery chemistry. The type of electrolyte used, aqueous (acid, alkaline) or non aqueous play a major role in battery energy density and safety. The primary focus of the survey procedure is on secondary batteries.

What are the different types of lithium batteries?

The lithium battery types covered by this Guide include lithium-ion, lithium-alloy, lithium metal, and lithium polymer types. For requirements applicable to conventional battery types (such as lead-acid, alkaline, etc.), please refer to the requirements in Part 4 of the ABS Rules for Building and Classing Steel Vessels.

What is a secondary battery?

Secondary (Rechargeable) Batteries. Secondary batteries can be charged/discharged many times over their life. These batteries are more cost efficient over the long term and are the best solution for high drain applications such as laptops, cars, motor drives, power tools, etc.

What if a regulator disagrees with the classification of a battery?

Where the regulator disagrees with the classification of a battery, they will ask the battery producer to provide written confirmation from the battery manufacturer that its specific model number is designed exclusively for industrial or professional use.

This Classification Note provides requirements for approval of Lithium-ion battery systems to be used in battery powered vessels or hybrid vessels classed or intended to be classed with IRS.

RULES FOR CLASSIFICATION OF SEA-GOING STEEL SHIPS Version: September 2017. RCN No.2
