

What is EMSA guidance on battery energy storage systems (BESS) on-board ships?

The EMSA Guidance on the Safety of Battery Energy Storage Systems (BESS) On-board Ships aims at supporting maritime administrations and the industry by promoting a uniform implementation of the essential safety requirements for batteries on-board of ships.

Why is Battery Care important for a ship's safety officer?

Batteries are used in almost every important equipment onboard ships, and yet not much attention is paid for their care and handling. This topic is specifically important for the ship's Safety Officer onboard. Hazards such as explosions that occur during charging of batteries mainly occur due to hydrogen as well as short circuits.

Are batteries safe onboard ships?

With regular usage of batteries onboard ships, we often forget the care and precautions that need to go with it. While it might seem irrelevant, they do pose a considerable chance of danger if not handled properly.

How are batteries arranged in a ship?

Arrangement to prevent rupture or explosion. - Batteries are arranged such that those are suitably secured to move with the ship's motion. - The battery casing, covering modules and cells, is made of a flame-retardant material. - Enclosures have

How do you protect a ship's battery?

(3) The vessel shall employ its own electrical protective devices (e.g. fuses or circuit breakers) to protect the battery and personnel but also to prevent damage to ship's equipment caused by battery defects. A positive lockable means of isolating the battery shall be provided to allow maintenance.

How many battery ships are on board?

Due to the powertrain arrangements on board. Battery Energy Storage Systems (BESS) installations on board ships have been increasing in number and installed power as the battery technology also develops. According to the Alternative Fuels Insight platform, there are more than 800 battery ships in operation, a figure that

Note. Effective 1 July 2015, all existing customers and new customers who wish to ship lithium metal batteries without equipment (UN3090) via UPS ® Air services must obtain pre-approval from UPS Airlines.
