

Why is Sierra Leone under resourced?

Sierra Leone's energy needs are under resourced and the scarcity of a reliable energy supply is one of the key impediments to Sierra Leone's economic and social development. The country's installed power capacity per capita is among the lowest in the world with approximately 105 MW available for a population of over 7 million in 2018.

Why does Sierra Leone need infrastructure investment?

The Government of Sierra Leone is also seeking infrastructure investment to support expansion of energy distribution and transmission networks. Sierra Leone has good access to natural resources necessary for energy production such as access to viable wind speeds and sunshine for renewable wind and solar projects.

What investment opportunities does Sierra Leone offer?

Sierra Leone offers investment opportunities in several segments of the energy industry including wind energy, solar energy, hydro, and bioenergy. The Government of Sierra Leone is also seeking infrastructure investment to support expansion of energy distribution and transmission networks.

Is there a need for electricity in Sierra Leone?

The GoSL has recognised an urgent need for access to electricity for the people of Sierra Leone. Only 15% of the total population of Sierra Leone currently has access to electricity, and only 2.5% of its rural population had access in 2016, according to World Bank data.

How does Sierra Leone's mining sector work?

The mining sector, which until 2014 generated Sierra Leone's biggest export in the form of iron ore (see the Natural Resources section for more details), is heavily reliant on in-house captive generation to supply its significant power needs. Outside of the industry the use of private generators is prevalent.

What is the future of renewables in Sierra Leone?

The renewables side of the sector remains a promising growth area for Sierra Leone; a study undertaken in 2016 by representatives of the Climate Investment Funds estimated the hydropower potential in Sierra Leone to be up to 2,000 MW capacity, with suitable development sites ranging from 2 MW to 160 MW.

Sierra Leone Telegraph: 16 June 2021: The International Finance Corporation, the private sector arm of the World Bank Group, and The Rockefeller Foundation (RF) today announced a new partnership that aims to ...
