How long does it take HPE Smart Storage Battery to charge?

Do one of the following: o Ensure that the HPE Smart Storage Battery is fully charged. It may take up to 120 minutes in a powered server or chassis for the HPE Smart Storage Battery to charge to support the number of battery-backed devices in the server or chassis.

Why is my smart array P440 cache disabled?

856 - The cache for Smart Array P440 in Slot 4 is disabled due to a cable error from the Smart Storage Battery. We have replaced the battery which also has a new cable. We've left it for multiple days now to see if it's the charge but the error remains.

What is smart update manager sum?

Smart Update Manager SUM is an innovative tool for maintaining and updating the firmware, drivers, and system software of HPE ProLiant, HPE BladeSystem, HPE Synergy, HPE Apollo, and HPE Moonshot servers, infrastructure, and associated options. SUM does not support third-party controllers, including flashing hard drives behind the controllers.

What is a battery backed write cache (BBWC)?

It's not directly part of the Smart Array controller. These batteries consist of two 18650 cells in a separate holder, located behind the front drive cage and connected to the mainboard. It performs a similar role to what HP (and others) used to call the battery backed write cache (BBWC) and then flash backed write cache (FBWC) though.

Aside from that issue, you have a problem with the server's Smart Storage Battery. In many cases, array acceleration and some other critical features rely on that battery to function properly. If the POST errors are ...

The warning was "Smart Storage Battery failure (Battery 1, service information: 0x0A). Action: Gather AHS log and contact Support" The server did not shutdown, I think because the write caching was not active. I replaced the faulty battery. Then I just took the module apart, checked each cell (two 18650 cells) and one was completely empty.

Any HPE ProLiant Gen9 server configured with an HPE Smart Storage Battery for HPE Smart Array Controllers or NVDIMMs receives a POST error message or an IML ...
