A solar cell panel, solar electric panel, photo-voltaic (PV) module, PV panel or solar panel is an assembly of photovoltaic solar cells mounted in a (usually rectangular) frame, and a neatly organized collection of PV panels is called a photovoltaic system or solar array.

Therefore, this paper presents a detailed analysis of the shear stresses between the layers and of the deformations generated in the curved solar panel reinforcement.

A 4 &#215; 4, 4 kW solar PV array which consists of sixteen panel of each 250 W rating is considered in this paper. The proposed PVATs are simulated in MATLAB/Simulink&#174; to assess the performance.

Nowadays, solar energy harnessed by photovoltaic (PV) panels is regarded as one of the most promising energy sources to deal with world energy crisis and global warming [1].For the purpose to generate more electricity from the same amount of solar energy, scientists relentlessly pursue higher and higher PV conversion efficiency [2].However, not only the ...
