

Why should you install a solar tube?

By installing a solar tube, you can bring abundant natural light into your interior spaces, transforming them into bright and inviting areas. The detailed steps and considerations outlined in this guide give you the knowledge and confidence to embark on a successful solar tube installation.

How do I choose a solar tube installation?

Look thoroughly at your interior space and identify areas that lack sufficient natural light. A solar tube installation can greatly benefit common spaces, including bathrooms, hallways, and dark corners. Assess the availability of direct sunlight and determine the most suitable locations for your solar tubes.

How to install a solar tube on a roof?

Make the necessary adjustments to clear the path for the solar tube. Measure and mark the precise location where the solar tube will penetrate the roof. Accurate measurements will ensure that the solar tube aligns perfectly with the opening on the ceiling, allowing for unobstructed light transmission.

How do I prepare for a solar tube installation?

Take the following steps to prepare yourself for a seamless installation: Look thoroughly at your interior space and identify areas that lack sufficient natural light. A solar tube installation can greatly benefit common spaces, including bathrooms, hallways, and dark corners.

Can solar panels be mounted on walls?

There are purpose-built solutions on the market for mounting solar panels on walls. These are costly, and you need to buy them for each panel. The added cost is an important consideration. However, the advantage of these systems is that you can angle your panels more easily, as this functionality is built-in.

How far from the wall can a solar panel be mounted?

Without projecting a panel beyond 200mm from the wall, from the wall, you can mount a typical panel with dimensions 170cm by 110cm at around 80°. A wall-mounted panel gives much better consistency and peaks in spring and autumn compared to the summer. Yearly production ~290kWh. There are multiple options for mounting panels on a wall.

Can't say anything about brand recommendations. I have only ever seen a solar tube once, at a friend's house. I really liked it for where they installed it (at the end of a dark hallway), but ...
