

How much does a solar farm land lease cost?

With solar farm land lease rents ranging from £850-£1100 (depending on variables such as development size and location) per acre per annum, rental rates compare favourably with other income streams such as agricultural and livestock farming, event hosting and storage services.

What is a solar farm land lease program?

Solar Farm Land Lease Programs offer an opportunity for farmers, estate owners and other landowners to diversify their income streams and realise the potential of land that may otherwise be left overgrown or redundant.

Should you lease land for solar power?

Here's the essentials: leasing land for solar power is a mutually beneficial deal between landowners and solar energy developers. While developers gain a new solar plant, the landowners gain a stable, long-term revenue stream from unused or underused plots. There's a third beneficiary - the UK itself, which gains increased clean energy capacity.

How does solar land lease work?

Land rental is paid per acre and compares favourably with other uses (including agricultural leasing). Solar land lease revenue streams provide financial certainty and can play a vital role in ensuring families maintain ownership of their farms and estates into the future.

What are solar land lease revenue streams?

Solar land lease revenue streams provide financial certainty and can play a vital role in ensuring families maintain ownership of their farms and estates into the future. The solar farm is planned, installed, maintained and decommissioned at no financial cost whatsoever to the landowner.
