

What is a solar roof system?

The system is made up of individual panels mounted onto the roof which sit on top of your existing tiles or other roof finish. This solar roofing system is proven and widely available, but the main downside is the aesthetics. With an on-roof system, the panels are clearly added on as an afterthought and are not integrated into your home.

What is on-roof solar roofing?

On-roof solar panels make up the most widely recognisable solar roofing system in the UK. The system is made up of individual panels mounted onto the roof which sit on top of your existing tiles or other roof finish. This solar roofing system is proven and widely available, but the main downside is the aesthetics.

What types of buildings can we install a solar system on?

Since our first installation in 2016, we have delivered a number of projects across all types of buildings including freestanding houses, villas, public and commercial buildings. See some examples below. In the Grimentz area, a chalet goes solar. A castle-like villa gets a facelift to embrace a sustainable energy transition.

What is an in-roof solar system?

An in-roof solar system offers the exact opposite. In this system, the panels are installed as part of the roof with the panels mounted on the roof battens in place of tiles. This allows them to sit flush and blend in seamlessly with the roof, as well as not contribute a notable amount of additional weight to the structure.

What is a hybrid solar roofing system?

A hybrid system has integrated batteries which are used to store excess electricity that your solar roofing system produces. You can then use this energy at a later date when needed rather than having to purchase excess electricity from the grid. For example, you could store it for use at peak times to save money that way.

Is the garage roof 100% photovoltaic?

In addition to the four roof surfaces on the house, the garage's roof is 100% photovoltaic. A modern new construction featuring a triangular roof surfaces fully covered with integrated solar tiles. For such an important heritage property, it was critical to preserve the historical appearance of the roof.
