Will a new battery chemistry boost EV production?

Expect new battery chemistries for electric vehicles and a manufacturing boost thanks to government funding this year. BMW plans to invest \$1.7 billion in their new factory in South Carolina to produce EVs and their batteries. AP Photo/Sean Rayford Every year the world runs more and more on batteries.

Is battery technology becoming more economical?

The good news is the technology is becoming increasingly economical. Battery costs have fallen drastically, dropping 90% since 2010, and they're not done yet. According to the IEA report, battery costs could fall an additional 40% by the end of this decade.

Are batteries the future of energy?

The planet's oceans contain enormous amounts of energy. Harnessing it is an early-stage industry, but some proponents argue there's a role for wave and tidal power technologies. (Undark) Batteries can unlock other energy technologies, and they're starting to make their mark on the grid.

Is 2025 a good year for EV batteries?

Finally, it looks like 2025 could mark a crucial step on the technology's path to becoming ready for production. These next-generation batteries are regarded as a holy grail for EVs because they offer greater capacity and more range than similar-sized lithium ion packs used today.

How will lithium-ion batteries change the world?

It is also expected that demand for lithium-ion batteries will increase up to tenfold by 2030, according to the US Department for Energy, so manufacturers are constantly building battery plants to keep up. Lithium mining can be controversial as it can take several years to develop and has a considerable impact on the environment.

Why are lithium-ion batteries getting better and cheaper?

Lithium-ion batteries keep getting better and cheaper, but researchers are tweaking the technology further to eke out greater performance and lower costs. Some of the motivation comes from the price volatility of battery materials, which could drive companies to change chemistries. "It's a cost game," Sekine says.
